sms:donate

Service description

Sms:donate is the simplest one of all our services, which was created due to numerous requests of our partners. From the point of view of installation and setup it is even simpler than sms:chat service. User's interface represents a simple button, and by clicking on it your website users will receive a short instruction with explanation how to thank the authors of their favorable resource by sending an SMS-message.

Functionality

User clicks the button which you can locate anywhere within any part of your web page, then user has to choose the country of his or her residence and mobile operator within specific country. To each and every country there belongs a list of available rates. This allows user to choose an SMS rate depending on which amount exactly he or she is willing to donate to your resource. Detailed instruction with SMS cost, the exact text of the message, and a relevant short code where the message is sent to will be offered in order to make sure that the amount deducted will be the exact amount user has chosen.

Installation and set up process

Go to [Control Panel](#) -> **Services** -> [sms:donate](#). Click **Add** to connect new **sms:donate** service to your account and fill in the given form. Be sure to enter correct website address which the service will be connected to. The service will start working after the inspection of the website by our moderators.

Technical info

Installation

To integrate **sms:donate** service in your network resource, the following HTML layout is used which can be located anywhere within your web page:

```
<script type="text/javascript">
/*  */
smsDonateId = sms:donate ID;
smsDonateButton = button ID;
/* ]]&gt; */
&lt;/script&gt; &lt;script type="text/javascript"
src="http://donate.smscoin.com/js/smsdonate.js"&gt;&lt;/script&gt;</pre></div><div data-bbox="99 600 900 673" data-label="Text"><p><b>sms:donate ID</b> must be replaced with your specific <b>sms:donate</b> service ID. You can choose most suitable for you website design button from the list of buttons in Control Panel, and insert it instead <b>Button ID</b> which generates an instruction for sending SMS-message when clicking on it.</p></div><div data-bbox="99 711 546 730" data-label="Text"><p>Demo version of the service can be found <a href="#">here</a>.</p></div><div data-bbox="106 857 278 878" data-label="Page-Footer"><hr/><p><a href="http://smscoin.net">http://smscoin.net</a></p></div><div data-bbox="109 904 278 920" data-label="Page-Footer"><p>© 2006-2011 Smscoin</p></div><div data-bbox="699 904 903 920" data-label="Page-Footer"><p>revision 7 from 01-02-2011</p></div>
```
